## Let the AC clean itself with Charlie's Coil Cleaner

Charlie's Professional Coil Cleaner is a ready-to-use cleaner specially formulated to be self-rinsing by the condensate water from evaporator coils of refrigerant-type dehumidifier systems.

Coil Cleaner works best as a maintenance cleaner of the coil while it is still connected in the fan/coil compartment of a refrigerant system. If used on devices other than evaporator coils, it must be rinsed (thoroughly) with water after spraying.

Coil Cleaner is formulated to be low-sudsing to help prevent residue and foam from overflowing the drain pan and entering the duct system during the rinsing process. Charlie's Professional is:

**It's the GREEN:** 82% biodegradable in just over a month.  
Rated safe for use around lakes, streams and oceans.  
Charlie's Professional is non-toxic.

**That CLEANS:** Nothing cleans as thoroughly as Charlie's Professional.  
Targets the stains, not the surface.  
No gloves or masks required. Safe for your skin.  
It rinses away completely.

### How to use

- Liberally wet surfaces with Coil Cleaner, let wet surface soak for 10-15 minutes. Re-spray surfaces with Coil Cleaner if they start to dry.
- Turn unit on and allow to run 30 minutes to an hour to fully flush coil. If unable to run system for that length of time, use a pump-up sprayer with water to liberally flush cleaner and soil from surfaces. Heavily impacted coils may require repeating cleaning cycles to remove debris.
- Do not allow Coil Cleaner to dry on coil surfaces, as damage to aluminum may occur.
