Heavy oil or sludge is no match for Charlie's Professional

Without oil, little in this world would run. But the lifeblood of industry is also filthy. When combined with contaminants, the sludge found at factories, on oil rigs, on trucks and everything elsewhere is a nightmare to clean. Many cleaners are more of a hazard to humans than the oils themselves. Charlie's Professional Cleaner Concentrate is a hard-surface agent originally developed for maintenance cleaning operations on industrial machinery. It is excellent for situations in which both effective degreasing action and safety are of paramount importance. Clean oil and sludge safely, effectively, and economically. Charlie's Professional is:

It's the GREEN: 82% biodegradable in just over a month.
Rated safe for use around lakes, streams and oceans.
Charlie's Professional is non-toxic.

That CLEANS: Nothing cleans as thoroughly as Charlie's Professional.
Targets the grime, not the surface.
No gloves or masks required. Safe for your skin.
It rinses away completely.

For hard surfaces:

- Apply Charlie's Professional Concentrate to area.
- Allow Charlie's Professional to linger for at least 30 minutes so that it can work its way behind the oils to gently release them without harsh abrasives.
- Using a spatula or other non-scratching tool, gently scrape surface clean of oil and sludge.
- Use a pressure washer to finish, using clean water for the rinse.
- Repeat if necessary. Charlie's Professional is non-toxic & completely biodegradable. No need to worry about effluent.

For fabrics and clothing (including washable filters):

- Apply Charlie's Professional Concentrate directly to fabric early on.
- Allow the Charlie's Professional Concentrate to sit and penetrate at least 30 minutes.
- In a washing machine, wash with up to two doses of Charlie's Soap for Laundry. Dosage depends on washing machine size.
- Repeat if necessary.
