## Clean, protect machinery with Charlie's Professional

Whatever industry you're in, especially if you make things, chances are somewhere in your process machines get dirty and grimy. And it's also a fair bet that these machines require cleaning and maintenance to function. When you clean, don't damage that machinery or the workers cleaning it.

Charlie's Professional All-Purpose Cleaner Concentrate is a hard-surface cleaning agent originally developed for maintenance cleaning operations on industrial machinery. It is excellent for situations in which both effective degreasing action and safety are of paramount importance. Clean expensive, delicate machines safely and economically. Charlie's Professional is:

**It's the GREEN:** 82% biodegradable in just over a month.  
Rated safe for use around lakes, streams and oceans.  
Charlie's Professional is non-toxic.

**That CLEANS:** Nothing cleans as thoroughly as Charlie's Professional.  
Targets the grime, not the surface.  
No gloves or masks required. Safe for your skin.  
It rinses away completely.

### Different applications require a different Charlie's. For example:

- Concentrate for heavy oils and greases. Allow to sit, gently scrape off then rinse heavily.
- All-Purpose Cleaner Ready-to-Use for heavy soil on surfaces you can't rinse easily. Allow it to sit 30 seconds to a couple of minutes to break the bonds between the soil and the surface; rinse with damp sponge or chamois.
- All Purpose Cleaner Ready-to-Use for light soil on many surfaces. Allow to sit, and wipe off or blow off with high-pressure air.
- ¼ cup of All Purpose Cleaner Ready to Use in bucket of water for hard surface floors. Mop and let dry.
- For fabrics (including washable filters), spray All Purpose Cleaner Concentrate on fabric until it penetrates the stain. Allow to sit for at least 30 minutes. In a washing machine, wash with up to two doses of Charlie's Soap for Laundry. Dosage depends on washing machine size, so check the package for exact measure.
